- Specials available:

Description

The DVD-nBUT anti-vandal button plate is an off-the-shelf professional solution to most user input requirements if connecting to the DVD-9 and DVD-P9 range of DVD player controllers.

The DVD-nBUT is supplied as a kit with the necessary wiring to facilitate quick connection of the anti-vandal buttons to the DVD-9 screw terminals; all that is required is a small flat bladed screwdriver.

The professional anti-vandal buttons are fitted to the 161x106mm brushed aluminium plate using rubber seals to prevent liquid ingress when used in a harsh environment.

DVD-nBUT (n=1-6)

DVD-3BUT shown

Applications

The DVD-nBUT are primarily for use within a kiosk environment where input is required from a user. Industrial applications are also possible due to the rugged nature of the product.
