

# Do you need an easy way to get your Monitor set up as a digital sign?

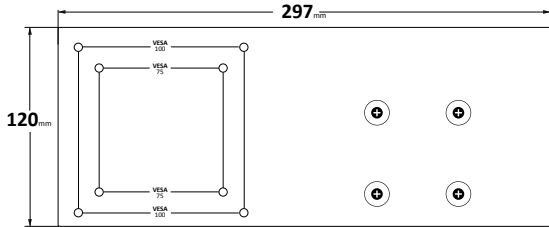

## VS-300

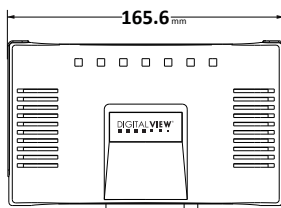

Consider the Viewstream 300 for a fast, easy to operate, and cost effective way to get your high resolution JPEG images and standard resolution MPEG clips playing on you monitor.

- Add up to 8 buttons for an interactive display
- Use a bar code reader to change tracks when a product is scanned.
- Use the data logging feature to track customer interaction.
- Content is stored on a compact flash card, no moving parts.
- Stereo audio output
- Secure mounting
- USB Updateable

### VESA MOUNT KIT

### VS-300

## VS-500

For high resolution full motion video, the Viewstream 500 is the right choice, with support for content up to 1080P native resolution

- Supports all Viewstream 300 interactive features
- HDMI, ARGB and HD component outputs.
- Plays all popular HD video formats
- Content is stored on a compact flash card, no moving parts.
- Stereo and digital audio output.
- Field upgradeable for network compatibility
- USB Updateable

Both solutions are supported by DV Studio Plus Digital View's easy to use play list creation application that can be downloaded at no charge from [www.digitalview.com](http://www.digitalview.com)
